SmartSite Valve Featured on Cover of LIFE Magazine...

The SmartSite needle-free valve recently had the distinct honor of appearing on the final monthly edition cover of LIFE magazine (May 2000). The cover photo was taken from the lead feature story on high-tech, high-risk care of premature infants. In the photo a child born at The Children's Hospital of Philadelphia, a recent ALARIS infusion pump and needlefree installation, is cared for using a Signature Edition infusion pump and SmartSite needlefree valve system.

The SmartSite® system offers healthcare workers peace of mind by providing a highly effective and dependable needle-free IV access system that is easy to use. From a full line of administration sets that are compatible with ALARIS Medical infusion pumps, to gravity sets, extension sets and components, the SmartSite® valve provides a complete needle-free system. The SmartSite system embodies ALARIS Medical System's commitment to the design of products that offer real-life solutions. For more information on the SmartSite needle-free system call 1-800-482-4822 or visit us on the web at www.alarismed.com.
